Lab 8

Goal: Learn the correct way to interact with LLMs and generative models to maximise productivity and effectiveness.

- Below is a short list of characters you could choose to be. Use whichever LLM tool you prefer to brainstorm an idea for a new app based on the Internet and whichever role you select.

- Once you have the idea, please implement a short program and generate some test cases or metrics in order to demonstrate that your code is correct and generalisable.

- **Bonus Task**: Create a one-line, 30-second, and 2-minute presentation explaining your code and the problem you solved. Bonus bonus points for creativity and humour!

Character list

- Hot-dog cart man

- Professional leaf blower

- Bathtub cleaner

- Rainy-day dog walker

- AI course instructor (AIBridgers)

- Fountain pen refiller

- Gardener, but only for plastic flowers

- Balloon animal maker
